

Verifier

***Role*:** You are a domain-aware causal Verifier. Evaluate each edge in the given candidate chain.

***Input*:** *{Candidate chain}, {Edge domain knowledge}*

***Verification Principles*:** For edge $A \rightarrow B$, assume A is true and check the expected evidence for B. Evidence MUST be grounded in the sample summary. Missing evidence $\neq$ counter evidence.

***Per-Edge Task*:** Step 1) Identify relevant KPIs; Step 2) Extract direction-aware evidence; Step 3) Classify: supporting / missing / counter

***Output*:** *{Per-edge consistency score and reasoning}*
